**DETAILED ACTION**

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 through 7 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 through 7 of copending

Art Unit: 3713

Application No. 09/903,095. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim player tracking device, host, communication link and bonus system host for a bonus system within a casino.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites "player tracking hosts associated ... are associated with said host". It is not clear which "host" is meant in the second recitation of "host". -Bonus tracking host-  
- is suggested, if such is intended by the Applicants.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1 through 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Acres, USPN 6,319,125.

Acres '125 discloses a system, method and apparatus for controlling bonus promotion system and which patron is entitled to a bonus using a bonus server, see section entitled Bonus Server, interconnected to a plurality of gaming devices. The Acres gaming system operates in combination with a player tracking server, each player carries a player tracking card and inserts said card into the gaming machine that is to be activated, see the section entitled Player Eligibility. The bonus prizes can be in multiple forms, see the section entitled Bonus Promotions, and based upon multiple configurable criteria.

Art Unit: 3713

The reference is deemed to meet the claims as broadly claimed as is evident upon study.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents issued to Acres seems to either demonstrated the lack of novelty or non-obviousness to the claimed invention.
